

# Evolve your Supply Chain & Manufacturing businesses

On April 21, 2021, Tarsus On Demand together with Microsoft and select partners is holding a webinar that aims to showcase three powerful cloud-built software solutions.

All three solutions have the potential to revolutionise businesses in the Supply Chain and Manufacturing industries.

## WEBINAR DETAILS

### SPEAKERS & SCHEDULE:

10:00 - 10:05	Welcome and Introduction	Chantelle Ashman, Tarsus On Demand
10:05 - 10:15	Exponential Tech in a Linear World	Anton Herbst, TTG & Tarsus On Demand
10:15 - 10:45	Keynote	Ahmad al Dandachi from Microsoft
10:45 - 11:00	Solution 1 Showcase	Eric Kingwell, Finstock
11:00 - 11:15	Solution 2 Showcase	Juan Kotzee, Drivatic
11:15 - 11:30	Solution 3 Showcase	Jan Naude, AutoSHEQ
11:30 - 11:55	Roundtable Panel Discussion	Anton Herbst
11:55 - 12:00	Closing	Chantelle Ashman

### GET TO KNOW THE SPEAKERS:

#### Chantelle Ashman

Chantelle is the ISV Sales Manager at Tarsus On Demand. She looks after Tarsus On Demand's extensive portfolio of Independent Software Vendors.

#### Anton Herbst

Anton has served in various roles in the Tarsus Technology Group since 2013, including eight years as TTG's Group Strategy Director and three as the Chief Marketing Officer.

Anton is accomplished in strategy, critical and long-term thinking, business model development, supply chain and inventory management, as well as marketing and cloud computing.

He is currently the CEO of both TTG and Tarsus On Demand, and he brings with him more than 20 years of experience in the South African ICT sector that encompasses information technology, supply chains, cloud services, and distribution.

#### Ahmad Al Dandachi

the last 16 years he has occupied various roles at Microsoft in the Middle East & Africa and France regions.

He is currently the Industry and Sales Lead for Energy and Manufacturing for the Middle East & Africa.

#### Eric Kingwell from Finstock

Eric is the Managing Director of Finstock (Pty) Ltd. He brings with him more than 25 years of experience in various executive roles within multinational companies both in South Africa and abroad.

He is deeply knowledgeable and passionate about supply chains and their associated technologies. In his career, Eric has created supply chain platforms within the manufacturing and retail sectors that have introduced many welcome efficiencies into complex logistics systems.

#### Juan Kotzee from Drivatic

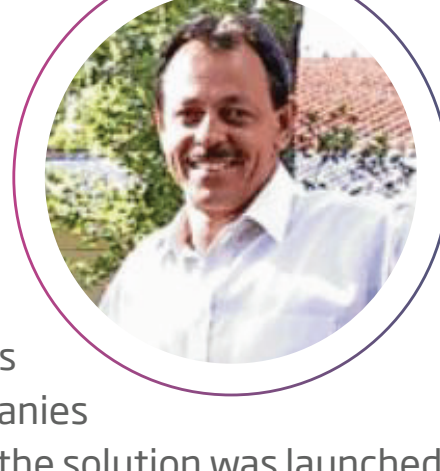

Juan is the founder and Managing Director of Drivatic, with a long history in the financial world. Working in the data analytics trenches for years, he realised that many companies were wasting a lot of time and resources on reports that didn't really achieve anything.

So, he founded Drivatic to empower organisations to do much more with their data. He was not only interested in helping them do their reporting faster, but to do it more accurately and produce actionable insights that could be used to make better decisions.

#### Jan Naude from AutoSHEQ

Jan is the owner and Managing Director of AutoSHEQ Solutions (Pty) Ltd. Passionate about software development since the early 90s, Jan has been involved in ICT in some capacity since 1986.

As a quality management system auditor, consultant, and trainer early on in his career, Jan got the idea to develop a web-based software system to help companies handle their paper-based processes better. Development started in 1999 and the solution was launched in 2001.

## SOLUTIONS OVERVIEW

### Solution 1: Finstock

Finstock is an authorised distributor of ToolsGroup's award-winning S099+ supply chain automating software which automates and optimises supply chains across a variety of industries, including manufacturing.

With S099+ at the heart of what the business does, and powered by Microsoft's Azure cloud, Finstock provides consultancy, software and managed services for inventory optimisation, demand forecasting and product replenishment planning that's accurate and reliable.

S099+ applies advanced analytics and technologies like AI and ML to data to help organisations predict demand more accurately and adjust their production schedules accordingly, it leverages sensor data and self-learning algorithms to reduce forecast errors, and can even help with the launch of new products by accurately predicting demand during launch.

All of this helps businesses to meet customer needs that are constantly in flux, in a timeous manner. Person from Finstock will present the solution in more detail at the upcoming webinar.

### Solution 2: Drivatic

Drivatic is a "Data Analysis as a Service" system that takes business data, uses AI and machine learning to produce deep insights that inform smarter decision-making.

Built on Microsoft's Power BI platform, Drivatic can ingest data from any source. It then applies predictive models and advanced statistical analysis to it that result in accurate insights that are 100% applicable to your business. These can be used in the decision-making process, resulting in smarter decisions that ultimately lead to improved overall business performance.

Drivatic can produce insights about supply and demand, stock levels, customer behaviour and much more in near real-time, allowing organisations to be proactive rather than reactive with their overall strategies.

Juan Kotzee from Drivatic will delve more into the solution's details during the webinar.

### Solution 3: AutoSHEQ

The cloud has been integral to the digital transformation of organisations across the globe. One of the biggest challenges the cloud has risen up to meet is the digitisation of old paper-based processes and converting them into digital ones that are far faster and more efficient.

This is the space that AutoSHEQ plays in: the solution offers to automate old paper-based Safety, Health, Environmental and Quality processes by converting them to an easy-to-use, easily-accessed web-based digital system.

These can be accessed from anywhere using just a smart device and a browser, dramatically speeding up actions that were once documented with paper forms and providing accountability and ease-of-search at the same time.

Jan Naude from AutoSHEQ will take the audience through the many benefits of the AutoSHEQ Management System Software on the 21st.

## REGISTER HERE

If you haven't yet registered for the webinar, we invite you to do so now. Simply click on the button below, fill in the form, and we'll send you the calendar invite so that you don't miss the event on the day.

We look forward to hosting you on the 21st of April!
